### Madrid, 14 January 2026

Compared with 2019 levels, before the pandemic, the annual increase is 14.9%.

Note. The total traffic registered by ENAIRe's network does not correspond to the sum of flights managed by each control centre (CC). This is because each CC records a flight depending on the route and airspace it crosses, but that flight is only counted once in the ENAIRe network as a whole. For example: a flight departing from Adolfo Suárez Madrid-Barajas Airport bound for Josep Tarradellas Barcelona-El Prat will be registered in both the Madrid and Barcelona CC, but only once in the network.
