

Press Release: DSNA Awarded Level 3 in CANSO's GreenATM Environmental Accreditation Programme

Brussels – 18 February 2026 – DSNA, the French Air Navigation Service Provider (ANSP), was today awarded Level 3 in CANSO's GreenATM environmental accreditation programme.

Launched in 2022, the CANSO GreenATM initiative offers a framework to assess ANSPs' progress in environmental sustainability and operational efficiency. The accreditation has five levels, each representing increasingly ambitious standards for sustainability and environmental responsibility across ANSP facilities and airspace operations.

DSNA's achievement of Level 3 included significant efforts in areas such as:

- the development and publishing of an environmental policy and plan;
- increasing opportunities for continuous descent and continuous climb operations at airports to reduce fuel burn in the land and take off cycle; and
- engaging staff in efforts to strengthen their individual role in the organisation's environmental efforts.

"It is impressive to see how, in just one year, DSNA has delivered so many improvements to progress from Level 2 to Level 3 accreditation under the CANSO GreenATM programme. It is a testament to their dedication to enhancing the environmental impact of their operations and their sustainable business practices.

We congratulate them on this impressive achievement,” said Simon Hocquard, CANSO President & CEO.

Frédéric Guignier, Director of French Air Navigation Services commented, “DSNA's progression to Level 3, just one year after achieving Level 2 in 2024, is a source of real satisfaction and confirms our commitment to continuous improvement of our environmental management.

Encouraged by its initial accreditation, DSNA has taken action to implement significant positive measures. This distinction rewards the organisation's efforts and its renewed commitment to helping reduce CO₂ emissions and noise, improving its energy performance, and integrating environmental considerations into its operations to improve its overall ecological footprint.”

The CANSO GreenATM programme encourages ANSPs worldwide to push for higher levels of environmental stewardship and collaborate on shared environmental goals.

About CANSO

CANSO – the Civil Air Navigation Services Organisation – is the global voice of airspace and is shaping our future skies. Its members support over 90 per cent of the world’s air traffic and include air navigation service providers, airspace users and operators, manufacturers, and aviation industry suppliers. CANSO raises the bar on global ATM performance by connecting the industry to share knowledge, expertise and innovation.

About DSNA

DSNA - Direction des Services de la Navigation Aérienne - is France's Air Navigation Service Provider (ANSP). DSNA provides safe, efficient, and eco-responsible air traffic management (ATM) within the French airspace, one of Europe’s busiest regions. As part of the DGAC (Direction Générale de l'Aviation Civile), DSNA ensures that both civil and military flights are safely coordinated, providing seamless air traffic control and flight information services to all its users.
