Adacel pursues RAAF Future Air Mission Training System (F-AMTS) as part of CAE-led Team AUStringer

Melbourne, Australia, 15 August 2023—Adacel, the global leader in air traffic control training and simulation solutions, is proud to announce the company has chosen to join the CAE-led Team AUStringer in response to the Commonwealth of Australia's Project AIR 5428 Phase 3, Future Air Mission Training System (F-AMTS).

Under the terms of collaboration, Adacel will support CAE Australia in the provision of state-of-the-art training solutions and services to deliver immersive Air Traffic Control (ATC) training seamlessly integrated within the F-AMTS located at RAAF Base East Sale, Victoria.

"As an Australian company, Adacel has been at the forefront of developing and delivering the world's most widely deployed ATC Tower simulation and training solution," said Daniel Verret, Adacel CEO. "With over a decade of experience supporting the Royal Australian Air Force (RAAF) ATC training programs, we are thrilled to partner with CAE, a renowned global training solutions provider. Together, we aim to create and deliver advanced ATC solutions that offer a highly immersive training environment, to surpass RAAF's specific training goals," continued Mr. Verret.

"CAE is pleased to welcome Adacel to its expert air mission training team. For decades, each Team AUStringer partner has helped global defence and security customers protect their national interests and their Aviators," said Matthew Sibree, Managing Director Indo-Pacific, CAE Defence & Security. "Together, we offer the Commonwealth the lowest risk F-AMTS solution that will assure the achievement of Air Force's operational goals and address the priorities set by the Australian Government through the recent Defence Strategic Review."

About CAE

CAE equips people in critical roles with the expertise and solutions to create a safer world. As a high technology company, it digitalises the physical world, deploying software-based simulation training and critical operations support solutions. Above all else, CAE empowers pilots, cabin crew, airlines, defence and security forces and healthcare practitioners to perform at their best every day and when the stakes are the highest. Around the globe, CAE is everywhere customers need them with more than 13,000 employees in approximately 250 sites and training locations in over 40 countries. CAE represents more than 75 years of industry firsts—the highest-fidelity flight, mission and medical simulators and training programs powered by digital technologies. Today and tomorrow, CAE ensures its customers are ready for the moments that matter.

About Adacel

Established in 1987, Adacel is a publicly traded company listed on the ASX. The company plays a significant role in global air space safety. A world-leader in its industry, Adacel applies cutting-edge technologies to develop advanced air traffic control simulation and training systems and state-of-the

art air traffic management solutions. Adacel's customers include international air navigation service providers (ANSPs), military, defense & security organizations, universities, and airport authorities. More than 21% of the world's airspace is managed with Adacel's Aurora ATM software. MaxSim Tower Simulator and Training systems lead the industry with the highest number of installations worldwide. MaxSim is also the first ATC simulation system in the world to deliver Virtual and Mixed Reality training capabilities into the classroom. Adacel's latest flagship system, REVAL, a digital Air Traffic Control (ATC) tower system delivers a wide spectrum of digital tower operational solutions, from consulting services to system design, development, deployment, and support.
