

ENAIRe signs a general protocol with the SIAM association to boost and develop air mobility in Spain

- ENAIRe plays a key role in the implementation of air mobility in Spain, and it will take part in analysing the feasibility and solutions of future cargo drone and air taxi flights
- The members of the Spanish Innovative Air Mobility include Ineco, Expodrónica, ITG, NTT DATA and Pinsent Mason
- Enrique Maurer, CEO: "We are committed to incentivising innovative air mobility by helping to develop the initiatives that come out of SIAM"

Madrid, 30 May 2024

ENAIRe plays a key role in the implementation of air mobility in Spain. As the responsible agency identified by the Ministry of Sustainable Transport and Mobility to implement the U-Space system in Spain, ENAIRe will, through its digital platform, provide the Common Information Services (CIS), which are essential to facilitate U-space services to drones and air mobility in cooperation with local air traffic services, so that all types of aircraft can fly safely in the same airspace.

SIAM, whose members include Ineco, Expodrónica, ITG, NTT DATA and Pinsent Mason, aims to become an international leader in innovation and high technology in the air mobility sector.

ENAIRe will collaborate with the association with the firm goal of promoting innovative air mobility and, in particular, with the Administrative Liaison Committee, which will be tasked with analysing issues presented to it by the coordinators of the projects to promote air mobility, or by any of its members.

This Committee, whose opinions will not be binding, will analyse the administrative, regulatory, urban, public and technical feasibility, as it seeks

to find solutions that encourage air mobility in Spain and make it a reality, facilitating future drone operations involving goods and air taxis.

“We are committed to incentivising innovative air mobility by helping to develop the initiatives that come out of SIAM”. These are the words of ENAIRE's CEO, Enrique Maurer, who stressed the importance of collaboration in a sector such as the advanced use of drones, which has such great potential.

About ENAIRE

ENAIRE is the air navigation service provider in Spain.

As a company of the Ministry of Sustainable Transport and Mobility, it provides en route control services for all flights and overflights from five control centres in Madrid, Barcelona, Seville, Gran Canaria and Palma, as well as approach services to every airport in the country.

In addition, 46 airports receive communication, navigation and surveillance services from ENAIRE, which also maintains their air traffic control systems, and 21 of them, including the country's busiest airports, rely on its aerodrome air traffic control services.

ENAIRE is Europe's fourth largest air traffic manager and participates in the A6 Alliance, a coalition of air navigation providers responsible for over 80% of European air traffic, and which is seeking to modernise the air traffic management system. It is also a member of other international alliances promoting the Single European sky, such as SESAR Joint Undertaking, SESAR Deployment Manager, iTEC, CANSO and ICAO.

ENAIRE, as the responsible agency identified by the Ministry of Sustainable Transport and Mobility to implement the U-Space system in Spain, will, through its digital platform, provide the Common Information Services (CIS), which are essential to facilitate U-space services to drones and Urban Air Mobility in cooperation with local air traffic services, so that all types of aircraft can fly safely in the same airspace.

ENAIRE has received the highest score in Europe on the aviation safety key performance indicator for four years in a row. It has also been awarded the
